

Mind is matter
Matter is mind

- intention
- ability to resist dimension
- shinto / mescal
- buddhism / hinduism
- Quantum physics

REF: Quantum bodies.

What is beyond the 5 senses, breath & sensation?

ask the mind!

- "who are you?" → silence, or I am
- "what are you?" → a stream of consciousness

The monkey mind & consciousness
monkey mind.

realm of experience (totality)
slices of visual stimulation / reality
"beyond dualism"
consciousness pole

energy "pole" capture our attention, creates feeling
i.e. beat, flashing light, sexual content, violence in movie.

- a totality of experience that "burns" on consciousness as the light on a film in photography.

it attracts us "love" within us for a moment it stimulates without boundaries, straight to what is true "human impulse,

- if suffering is part of life
- if buddhism wish to describe the reality
- help liberate humans from suffering

- as our light shines, that everyday a situation is an opportunity for practice!
Is avoiding that stimulation a lie?

i.e. addiction / drug / violence / suffering,

impulse ↔ source of being
